

# **An association that works against discrimination : QHUBEKA**

Qhubeka is a global charity that moves people forward with bicycles in Africa. People earn bicycles through their programs, and improve their access to schools, clinics and jobs. A bicycle is a tool that helps people to travel faster and further, to generate income and to carry more. In the face of extreme and important poverty, bicycles can change lives by helping to address challenges at the most basic level – helping people to get where they need to go.

Qhubeka is a really important association in Africa, where trips are really complicated, and those bikes improve the life of the population.
